A one day residency on campus in our Simulation Center is required.

Clinical Placements:

We do facilitate clinical placements for students. We have existing agreements with numerous hospitals, clinics and health departments in SD, MN, IA and ND. Students are asked to fill out a request form approximately 9-12 months prior to each clinical placement. This form allows the student to list potential sites they would like to complete their clinical. Once this is received, we determine if we have an existing agreement with the facility, if we do, we work on arranging the clinical. If we do not have an existing agreement, we will begin the process.

All the student has to do is complete each clinical request form and return to the program coordinator. We will complete all requests, all paperwork and arrange each clinical rotation.

If you have additional questions concerning clinical placements, email Tonya Struble
